

Stock Color Outer Wraps

We stock spiral outer wrap paper in a variety of colors and finishes ranging from matte to hi-gloss. This is a list of our stock outer wrap options, as well as those available by special request (denoted with *). Each swatch also designates a Pantone Matching System (PMS) color that best represents the color of the printed paper and finish. Please note that every computer monitor varies slightly in color and will display colors differently. You will also get varying results when these pages are printed on different printers and on different paper stocks. We have made efforts to ensure that the PMS color that is specified below each color sample is as accurate as possible.

About the Pantone Matching System®

The Pantone Matching System® (PMS) is a system shared world wide by the graphics and printing industries. Please use these examples as a guide for selecting your color. For a more accurate representation, compare the PMS number shown with a Pantone Matching System® guide to see the actual color. You may also call us to request an actual paper sample.
